(a) placement of the mixing (Al, 550 nm), r = 0.97
device-side − exit-side mixing (pp of η_sta)
p − p_mix = σ²/(1 − p)
planar
scattering layer
hemispherical MLA
freeform MLA
random MLA
wavy surface
(b) slab with planar exit face and back reflector
extraction efficiency
refractive index n of the slab
no mixing
complete mixing at the exit face
complete mixing at the back reflector (= fully randomized model)
R = 0.90
R = 0.98
